

FIRST STEP INTERNATIONAL SCHOOL

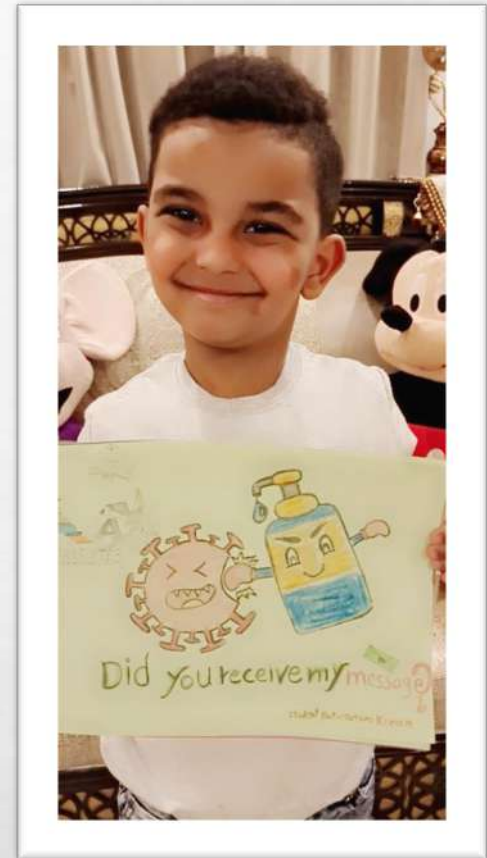

Kindergarten 2 students enjoyed making cakes at home as one of their school activity.

Cooking makes the children practiced their patience and it is also good for their eye and hand coordination.

Students had an activity regarding the Covid-19 virus in which they made posters, drawing to spread awareness among young people. This activity is given for their young minds so they would understand what is currently happening worldwide.

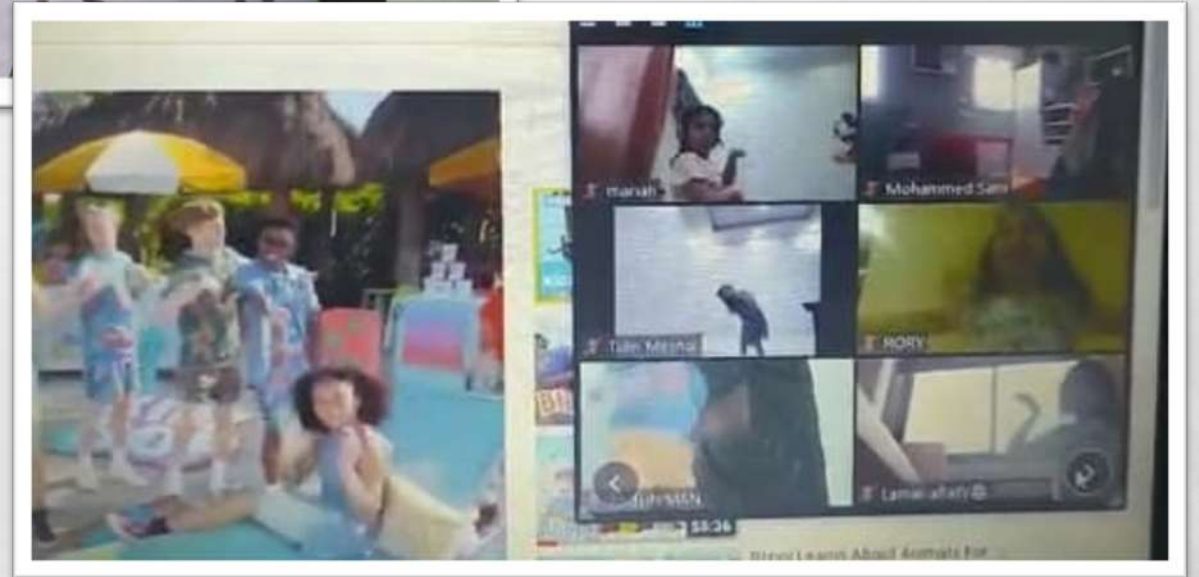

**Kindergarten 3
students given this number
worm activity to enhance
their counting, creativity
and abstract thinking
skills.**

**It is good to give an
enjoyable learning
experience to children for
they still learn through
play.**

Students as well as the teachers showed their dancing talents via zoom.

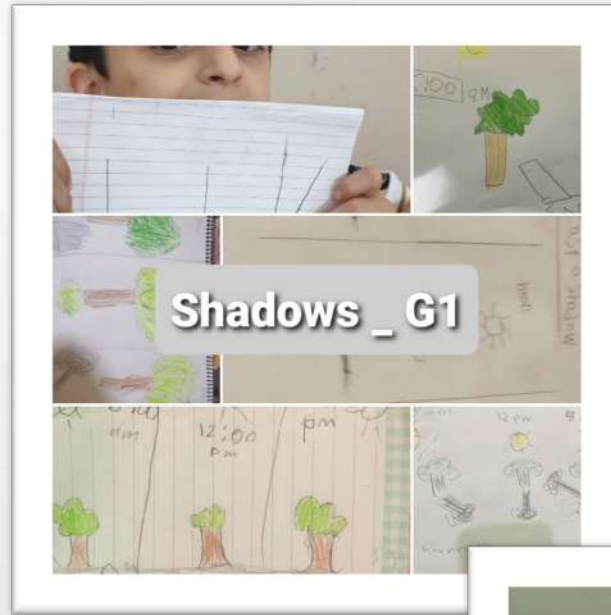

This activity creates an exciting and inclusive environment for learning to students.

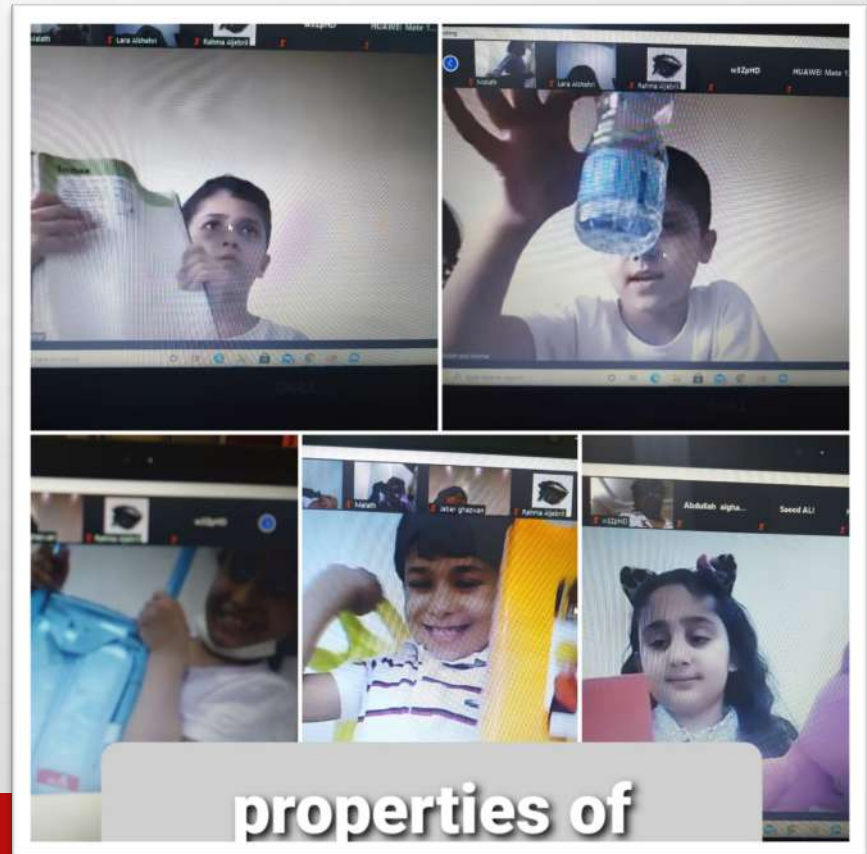

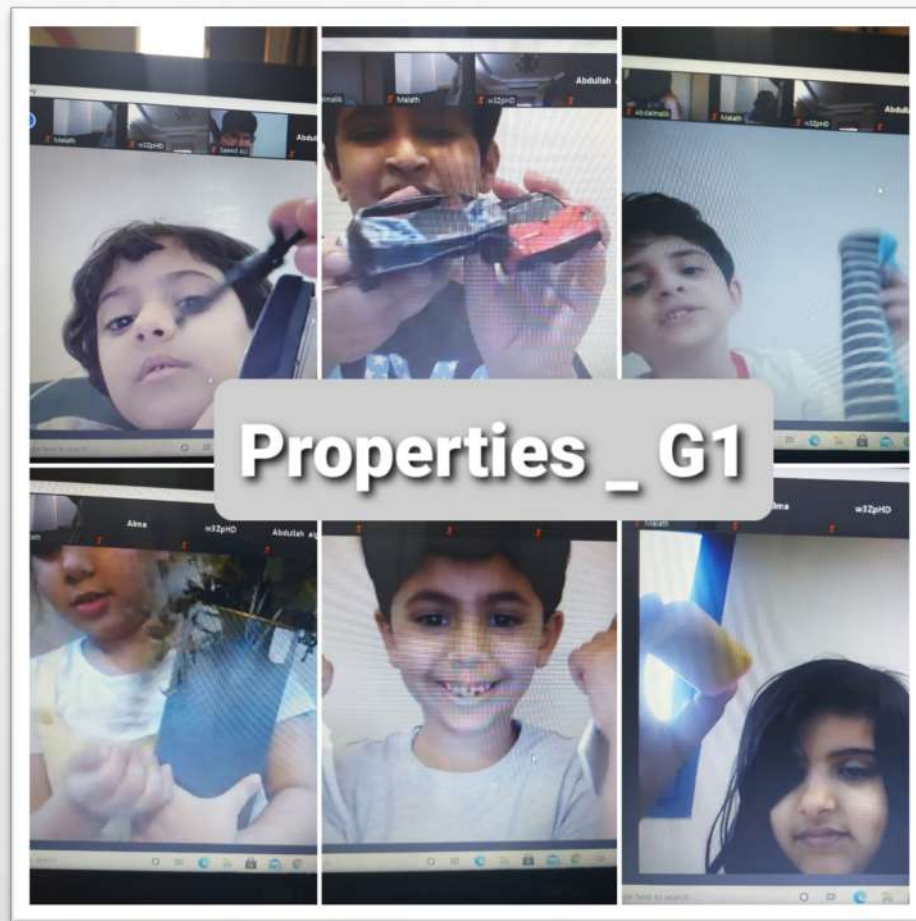

Various science activity was given and enjoyed by the grade 2 students, in which they arranged the planets orderly using objects at home and the students used their creativity by drawing and crafting to show the solar system.

Science class was made fun and easy by doing the activities from the book and some are drawn regarding different weather/seasons and as well as how sunlight affects objects around us to form shadows.

Students learned the properties of matter by making them show objects and indicate each state of matter.

Fire prevention and fire awareness activity was given to students for them to be alert and to be mindful of the dangers that the fire can make.

Students participated in celebrating International womens day by making message cards for their Mothers and sisters to show their appreciation and admiration to them.
